

## Equalizer version history

**Version 2.0** (build 16a) released October 31, 2016:

- Allows both custom pre- and post-equalizers.

**Version 1.9.4** (build 15e) released March 12, 2016:

- Improved audio monitoring for files >48kHz.
- 18dB/octave lo-cut Butterworth filter.
- Minor bug fixes.

**Version 1.9.3** (build 15d) released July 19, 2015:

- Revised GUI layout & scaling.
- Minor improvement to algorithms.

**Version 1.9.2** (build 15c) released May 8, 2015:

- Fixed bug in choosing post-equaliser setting in some situations.
- Revised layout of under interface for high-resolution, scaled, displays.
- Minor bug fixes.

**Version 1.9.1** (build 15b) released June 30, 2013:

- Choice of File Dialog types.

**Version 1.8.5** (build 14f) released March 2, 2013:

- Minor bug fixes.

**Version 1.8.4** (build 14e) released January 31, 2013:

- Fixed bug with mono files over 48kHz.

**Version 1.8.3** (build 14d) released October 7, 2012:

- Fixed problem printing the about box.

**Version 1.8.2** (build 14c) released August 31, 2012:

- Minor interface improvements.

**Version 1.8.1** (build 14b) released August 29, 2012:

- Minor interface improvements.

**Version 1.8** (build 14a) released July 14, 2012:

- Can select sound-buffer length.
- ClickRepair now bundled with ClickRepairRT.
- Revised manual for new features and information on ClickRepairRT.

**Version 1.7** (build 13c) released February 4, 2012:

- More flexible custom equalizers.
- Multiple file Drag and Drop.

- Drag and Drop checks for over-writing files.
- Better integration with Mac OS X (Drag and Drop onto Application icon, etc.).
- Revisions of French and German interface.

**Version 1.6.1** (build 13b) released January 11, 2012:

- Improvement to Drag and Drop interface.
- Minor bug fixes.

**Version 1.6** (build 13a) released November 12, 2011:

- Can set breakpoints.
- Drag and Drop interface for single file processing.
- More robust handling of unacceptable files.
- Changes to File Dialog workaround introduced in version 3.4.2 (Mac only).
- Minor bug fixes.

**Version 1.5.5** (build 12f) released June 26, 2011:

- Automatic update notification.

**Version 1.5.4** (build 12e) released June 11, 2011:

- Minor bug fixes.

**Version 1.5.3** (build 12d) released May 21, 2011:

- Fixed Windows bug introduced in previous release.

**Version 1.5.2** (build 12c) released May 3, 2011:

- Work-arounds for problems with FileDialogs on Mac OS X.
- Minor bug files.

**Version 1.5.1** (build 12b) released August 19, 2010:

- Improvements to user interface.
- Fixed bug in handling files with meta-data.

**Version 1.5** (build 12a) released August 7, 2010:

- Improvement to batch processing interface.
- Sound output further revised.
- Minor bug fixes in dialogs.

**Version 1.4.1** (build 11b) released April 26, 2010:

- Fixed potentially serious issue with 32-bit float format files.

**Version 1.4** (build 11a) released April 5, 2010:

- Can process files up to 192kHz (using resampling).

- Facility to save and restore custom settings to file.

**Version 1.3** (build 10d) released February 23, 2010:

- Enhanced batch setup allowing for more files.
- Drag and drop support in batch mode.

**Version 1.2.2** (build 10c) released December 13, 2009:

- Revised Java Sound Output features.
- Restored Mac file-association feature accidentally omitted from version 1.2.1.
- Minor bug fixes.

**Version 1.2.1** (build 10b) released December 6, 2009:

- Minor interface enhancements.
- New bundled Java for Windows.

**Version 1.2** (build 10a) released October 25, 2009:

- New options for Java Sound Output settings.
- New preferences location for Windows.
- Minor interface enhancements.

**Version 1.1.6** (build 9e) released August 16, 2009

- Will process AIFF files longer than 2GB.
- Java defaults updated for Mac OS.
- New launcher and installer for Windows version.

**Version 1.1.5** (build 9d) released December 17, 2008

- Minor interface enhancements.

**Version 1.1.4** (build 9c) released October 27, 2008

- Minor bug fixes.
- Minor interface enhancements.

**Version 1.1.3** (build 9b) released August 31, 2008:

- Improved Windows Installer.
- Minor bug fixes.

**Version 1.1.2** (build 9a) released July 8, 2008

- Processing 32-bit float files (aifc type fl32, wav type 3).
- Enhanced preferences for saving files.
- Minor interface enhancements.

**Version 1.1.1** (build 8b) released May 2, 2008:

- Minor improvements to batch dialog.
- Minor bug fixes.

**Version 1.1** (build 8a) released April 13, 2008:

- Custom equalizers may now be defined and saved for re-use.

- Minor bug fixes.

**Version 1.0.2** (build 7e) released March 24, 2008:

- Minor bug fixes.

**Version 1.0.1** (build 7d) released March 21, 2008:

- Decca 78 equalization amended.

**Version 1.0** (build 7c) released March 20, 2008:

- First shareware release.
